- 1 because it could restrict free expression and political association by limiting where contributions can come from, viewed as an overreach by the government.
- 2 because it ensures that government spending is regularly reviewed and justified, aligning with limited government principles.
- 3 I will carefully review HB 697 and SB 750 to determine whether they align with constitutional principles and the best interests of Floridians. At this time, I cannot commit to championing this legislation without further evaluation.
- 4 because reducing taxes promotes economic freedom and limits government reach, in line with limited overnment.
- 5 I will support reviewing and potentially reforming DROP to ensure fiscal responsibility and efficient government.
- 6 as long as changes do not breach existing contracts, consistent with constitutional protections.
- 7 because it is a state matter and supports principles of democratic governance and accountability. 7
- 8 as long as it adheres to federal environmental laws, supporting state rights and energy independence.
- 9 because it enhances Florida's financial independence from Federal oversight.
- 10 belief in the constitutional rights guaranteed by the Second Amendment, which includes the right of all law-abiding citizens to own and bear arms.
- 11 because it supports state sovereignty, economic growth, limited federal interference,

- and a balanced approach to environmental stewardship
- 12 because it upholds Second Amendment rights, enhances school security through localized decision-making, and respects state sovereignty and parental choice in education safety measures.
- 13 because it emphasizes First Amendment rights by ensuring that any restrictions on speech, particularly around obscene materials, are carefully tailored to respect free expression while still protecting community standards and the welfare of minors.
- 14 because I believe in the constitutional principle that no external authority should override American laws and governance. .
- 15 I support a Florida State Resolution to REDEFINE birthright citizenship because I interpret the 14th Amendment's clause "subject to the jurisdiction thereof" to imply full political allegiance, not just physical reference.
- 16 because this could potentially conflict with the right to privacy and the principle of limited government, both central to constitutional conservatism.
- 17 because it may reduce parent's direct control over their children's education, contradicting constitutional conservative values of individual liberty and parental rights.
- 18 because supporting a Protection of Life Amendment that recognizes life begins at conception upholds the intrinsic value and rights of the unborn, reflecting a strong commitment to the sanctity of life.
- 19 because as a constitutional conservative I believe it is crucial to uphold the principles of parental rights, family values, free speech and due process under the law,
- 20 because supporting a National balanced budget amendment aligns with fiscal responsibility and limited government, ensuring financial stability and state involvement in federal decisions.
- 21 because it underscores a commitment to acknowledging the cultural and moral foundations that many believe guided the framers of the Constitution and American law.
- 22 because it aligns with the principles of federalism, ensuring that Florida maintains control over its resources and upholds the constitutional balance between state and federal powers
- 23 I am withholding a position on this question because a prudent constitutional approach requires thorough analysis and extensive public consultation to ensure any significant fiscal policy changes are well informed, reflect the will of the people, and maintain fiscal stability.
- 24 because maintaining a closed primary system better preserves the integrity of political parties by allowing only registered party members to select their candidates.
- 25 because it upholds the Second Amendment right to bear arms while promoting responsible gun ownership through competency tests and excluding individuals with felony convictions or mental incompetency, ensuring a

balanced approach to public safety and individual freedoms.

- 1 Florida has become a national leader in the effort to push back on Washington. Many donors in other states support Florida Congressmen, Legislators, and State Officials in that effort. We should not pass laws to inhibit their participation in that effort.
- 5 I would be in favor of reforming before eliminating. DROP as was originally intended was helpful for people to retire early. What should not be allowed is the abuse of a DROP option followed by reemployment at the same or a similar job so that double-dipping ensues.
- 9 This is a very worthy goal, but we do have a challenge with a lot of federal transportation, healthcare, education, and national security pass-throughs, and we need to work with conservatives in our Congressional delegation to disengage from those federal dollars in the best way.
- 11 I would be in favor of expanding drilling in Gulf waters, but the limit must be larger than 10 miles so that the potential spills can be contained before impacting Florida Beaches. The current limit is 125 miles. I would be in favor of reducing that to 50 miles off the coast. Currently Cuba has deep water wells in operation on their northern waters near the Florida limits, and we should not let them have unconstested to our oil reserves
- 17 I want to work on eliminating 100% of property taxes. Designation of taxes is not feasible for any issue.
- 22 I have already led the way in making Marco Island a city that will always preserve the Bill of Rights.
